#### NOTES:

This is a PARTIAL list. Many, many more Otero County residents oppose the so called Salt Basin Deep Borehole Research Project (Department of Energy nuclear waste disposal research in Otero County).

Surveys taken in community outreach meetings (conducted by the DOE contractor TerranearPMC) showed overwhelming opposition. My informal polling showed more opposition after these meetings than before. No one who bothered to attend these meetings would claim significant local support for this project.

Opposition list is growing daily. This list is as of May 2, 2017
